

SUMMARY TREASURY STRATEGY Q1 2022

Treasury & Asset Management
Basel, 31 December 2021

Public Information

EUROFIMA
European Company for the Financing
of Railroad Rolling Stock
Rittergasse 20
4051 Basel

Objective

The TREASURY STRATEGY is a document produced by the Treasury & Asset Management unit with the purpose to review and guide its investment activities. The objective is to define the investment strategy for the next quarter as well as to align our investment decisions to EUROFIMA's long-term investment goals. This is a summary of the internal extended version of the TREASURY STRATEGY which contains a market overview, a performance and portfolio review as well as a section dedicated to strategy. The document is submitted to the Management Committee for approval each quarter end.

EUROFIMA publishes this summary of the TREASURY STRATEGY on its webpage with a focus on the portfolio overview and key risk metrics. The objective of this summary is to increase transparency in our investment activities and give an update on our progress on the topic of responsible and sustainable investment management.

Portfolio Overview

The investments managed by the Treasury & Asset Management unit are allocated into four dedicated portfolios, which are defined based on the purpose and the source of funds. These portfolios are named accordingly, see below for the respective details.

Following EUROFIMA's official signing of the United Nations-supported Principles for Responsible Investment (PRI) in January 2020, the Treasury & Asset Management unit applies Environmental, Social and Governance (ESG) integration according to the Six Principles for Responsible Investment in its investment decision process for all portfolios and for 100% of its investments.

Equity Funded Portfolio

The source of funds in the Equity Funded Portfolio is the organisation's paid-in shareholder capital, reserves and retained profits. The investment strategy pursues a favourable long-term total return through fixed income investments, while giving particular consideration to capital preservation.

Overview existing Equity Funded Portfolio Investments¹:

¹ Year figures show year end, data as of 13 December 2021

Funded Liquidity Portfolio

The Funded Liquidity Portfolio is funded by borrowing in the money and capital markets. The investment strategy is to ensure EUROFIMA's liquidity at any given time and to fulfil requirements set by external credit rating agencies or internally.

Overview existing Funded Liquidity Portfolio Investments²:

Margining Portfolio

The Margining Portfolio is comprised of cash received or placed as collateral against the market values of all derivative instruments under Credit Support Annex (CSA) agreements. The investment or funding strategy aims to efficiently manage this collateral. The portfolio is invested in short-term EUR denominated deposits.

Warehousing Portfolio

The funds in the Warehousing Portfolio are raised in the money and capital markets. The investment strategy for this portfolio, which acts as a temporary storage of funds to facilitate Equipment Financing Contracts (EFC), is dependent on the disbursement to railways. The portfolio is invested in short-term EUR denominated deposits.

² Quarter figures show quarter end, data as of 13 December 2021.

Investment Strategy

The overarching investment strategy of the Treasury & Asset Management unit is to achieve the portfolio objectives within a pre-defined risk budget with respect to liquidity, financial risks and ESG according to our [TREASURY POLICY](#). The key metrics relevant for steering the portfolios are shown in the table below. Treasury & Asset Management unit's investment activities follow a three-dimensional approach, which incorporates interest rate risk targets, credit risk targets and ESG score targets. The unit's processes and operations are specified in the PORTFOLIO GUIDELINES.

Strategy for Duration, Risk-weighted Assets and ESG Scoring:

	EQF		FL		MARG	
	Target ³	Current	Target ³	Current	Target ³	Current
Modified Duration	6.00%	5.90%	0.35%	0.36%	0.20% ⁴	0.15%
Risk-weighted Assets	EUR 275m (Ø18%)	EUR 262m (Ø17%)	EUR 400m (Ø16%)	EUR 375m (Ø16%)	Ø 12.0%	Ø 9.5%
ESG Scoring⁵	below 20.0	15.7	below 20.0	14.7	below 20.0	16.3

Concerning the Q1 2022 targets for the Equity Funded Portfolio, we tactically set the duration target at the lower band of the long-term target at 6.0%. In order to meet the long-term investment targets for the risk-weighted assets, we keep the value for end of Q1 2022 at EUR 275m which is within the general limits set by the Board of Directors. In the Funded Liquidity Portfolio, we will keep our duration and risk-weighted asset targets unchanged. Also, for the Margining Portfolio, we will keep all targets as they were for the last quarter. In terms of ESG scoring, we target a weighted scoring below 20.0 which translates into the Sustainalytics risk rating of "low risk"⁶ for all three portfolios.

³ Target for end of Q1 2022

⁴ The target duration for MARG will be reviewed during Q1 2022 with the establishment of the new risk framework

⁵ Figures represent weighted-average Sustainalytics scores, most of non-rated investments are mapped to the respective government

⁶ Sustainalytics ESG risk ratings: 0-10 negligible, 10-20 low, 20-30 medium, 30-40 high, 40+ severe
